Mallorytown Landing

Black-legged ticks and the bacteria that causes Lyme disease are known to be present in the Thousand Islands Region, including the mainland and are also now known to be present in a wider region of Eastern Ontario. They range in size from 1-5 mm.

La présence de tiques à pattes noires et de la bactérie responsable de la maladie de Lyme a été signalée dans la région des Mille-Îles, y compris sur la terre ferme, et ailleurs dans l'Est de l'Ontario. De tailles variées, elles mesurent de 1 à 5 mm.
